

$p_t = \phi p_{t-1} + \varepsilon_t$, same shocks

Dickey-Fuller law (with a constant)

— $\phi = 1$: unit root, $I(1)$

— $\phi = 0.5$: $I(0)$

— $\phi = 0.98$

■ simulated τ under H_0 ($\gamma = 0$)

--- $N(0, 1)$

..... Normal 5% value -1.645

— DF 5% value -2.86
